The Children's Hunger Project has found that there is an incredibly large number of elementary school children in Brevard County who are poorly fed, especially on the weekends. This has a negative impact on the learning experience. Each Friday, The Children's Hunger Project provides backpacks of food (ravioli or spaghetti and meatballs milk, juice boxes, breakfast bar, cereal, and other food items) for these kids so that they will have basic nutrition at least on the weekends. On Monday, the kids return to school but with a better and healthier foundation for learning. The District 5 Members invite you to come out and support this cause nominated by Ronald Reed and see an incredible collection of cars that will make you smile.
